Santander Consumer Finance S.A.

Update to credit analysis

Summary

[Santander Consumer Finance S.A.](#)'s (SCF) A2 deposit and senior unsecured debt ratings reflect the bank's baa2 Baseline Credit Assessment (BCA); the high probability of support from its parent [Banco Santander S.A. \(Spain\)](#) (Banco Santander, A2 stable/A2 stable, baa1¹), resulting in a one-notch uplift and an Adjusted BCA of baa1; and an extremely low loss given failure for junior depositors and senior unsecured creditors based on our Advanced Loss Given Failure (LGF) analysis, resulting in a three-notch uplift. However, the bank's long-term deposit and senior unsecured debt ratings are capped at A2, two notches above the [Government of Spain's](#) Baa1 rating. Because SCF belongs to Banco Santander's resolution group, we apply the Advanced LGF analysis of its parent company to it.

SCF's standalone baa2 BCA reflects its overall sound credit risk profile, with low asset risk relative to its business profile as a consumer finance lender, and good profitability although constrained in the current context of higher interest rates because of the slower repricing of assets relative to liabilities. The BCA also reflects the bank's monoline business model focused on consumer finance, and its high reliance on market funding. We expect some deterioration in SCF's asset-quality metrics over the next 12-18 months as a result of inflationary pressures, economic slowdown and higher debt-servicing costs, factors which will weaken households' purchasing power in the main countries where SCF operates.

Exhibit 1

Rating Scorecard - Key financial ratios

Source: Moody's Financial Metrics™

Credit strengths

- » Strong geographical diversification, which drives consistent profitability and reduces earnings volatility
- » Solid profitability and low asset risk
- » Good risk-absorption capacity and ongoing support from its parent (Banco Santander) if necessary

Credit challenges

- » Likelihood of asset-quality deterioration because of high inflationary pressures, economic slowdown and higher debt-servicing costs
- » Lack of business diversification because of its concentration in the cyclical consumer finance business
- » Pressure on profitability because of the slower repricing of assets vs liabilities at the higher interest rates
- » Funding profile characterised by a high reliance on market funding

Outlook

The outlook on SCF's long-term deposit and senior unsecured debt ratings is stable, reflecting our expectation that the bank's financial performance will be sustained over the next 12-18 months. The outlook on SCF's ratings is aligned with the outlook on its parent, Banco Santander.

Factors that could lead to an upgrade

An upgrade of the baa2 BCA would require an improvement in the bank's financial indicators, principally stronger solvency levels and lower reliance on market funding. An upgrade of the BCA would result in the convergence of our assessment of the bank's standalone creditworthiness with that of its parent Banco Santander, therefore not affecting its Adjusted BCA of baa1.

Similar to those of its parent, the bank's long-term deposit and senior debt ratings could be upgraded if Spain's sovereign rating is upgraded.

Factors that could lead to a downgrade

We could lower SCF's standalone BCA if the bank's asset quality deteriorates beyond our current expectations, or we assess a lower probability of parental support or a weakening in Banco Santander's creditworthiness.

A downgrade of Spain's government rating could also lead to a downgrade of SCF's deposit and senior unsecured debt ratings.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

Profile

SCF is one of Europe's leading consumer finance companies, with total assets of €136 billion as of June 2023. The bank benefits from a large and geographically diversified franchise, built principally through acquisitions in markets with significant growth potential. SCF is present in 16 European countries, with leading positions in many of them. Germany is the most relevant market, with 3.5 million clients and representing almost 40% of SCF's total loan book, followed by the Nordic countries, Spain and France. Outside Europe, SCF has smaller-scale operations in China and Canada.

SCF provides car dealers, retailers and consumers with a range of consumer finance products and services, including automotive financing, consumer durable financing, credit cards, stock credit financing, insurance and mortgages. SCF represents around 14% of Banco Santander's net profit.

In April 2023, SCF and Stellantis group closed the agreement they had reached in March 2022, whereby SCF, in partnership with Stellantis Financial Services, will finance all of Stellantis' branded vehicles in eight European countries: Spain, Belgium, France, Italy, the Netherlands, Luxembourg, Poland and Portugal. Although the agreement entails that SCF will no longer finance the activities of Stellantis in Germany and the UK, SCF expects the outstanding portfolio from Stellantis' brands to increase by 30% in 2026 from that as of year-end 2022.

Detailed credit considerations

Low problem loan ratio, but asset risk is likely to increase

We assign SCF an Asset Risk score of a3, in line with the macro-adjusted score. Our assessment reflects the bank's historically low nonperforming loan (NPL) ratio and incorporates a likely moderate increase in problem loans as a result of inflationary pressures, economic slowdown and higher debt-servicing costs, factors which will constrain households' purchasing power in the main countries where SCF operates.

SCF benefits from sound asset quality in light of its business profile as a consumer finance lender, with an NPL ratio that has consistently been around 2% for several years (2.01% as of the end of June 2023) and even through the pandemic. The bank's share of Stage 2 loans² remains low as well, at 3.7% of total loans as of year-end 2022, compared with 9.4% for European banks, according to European Banking Authority (EBA) data.

Although the low NPL ratio is partly supported by portfolio sales in which SCF actively engages, the solid asset-quality performance is also reflected in the bank's cost of credit, which has historically been lower than what one would expect in the consumer finance business. The cost of credit only increased substantially in 2020 to 83 basis points (bps), in light of the €186 million extraordinary provision booked to tackle the economic consequences of the pandemic, reducing to 49 bps in 2021 and 42 bps in 2022, close to pre-pandemic levels (38 bps in 2019). The bank has a sound provisioning policy, which aims to swiftly reflect asset-risk deterioration and translate into high loan loss coverage ratios, although such ratio declined moderately in 2022 to 90% staying below pre-pandemic levels (98% in 2019).

Exhibit 3

SCF shows strong asset-quality metrics for a consumer finance lender, although we expect a moderate increase in problem loans

Source: Moody's Investors Service and SCF annual reports

Adequate solvency levels

With a tangible common equity (TCE) ratio (defined as TCE/risk-weighted assets [RWA]) of 10.5% and a leverage ratio (TCE/total tangible assets) of 6.5% as of December 2022, SCF has an adequate capital position, which we assess at baa3. Unlike that of many of its Spanish peers, SCF's TCE does not contain low-quality elements, such as deferred tax assets (DTA).

From a regulatory standpoint, SCF reported a fully loaded Common Equity Tier 1 (CET1) capital ratio of 12.5% as of December 2022, in line with its long-term target. The ratio remained hardly unchanged from 12.6% at the end of 2021 despite 6.3% growth in RWA, supported by the bank's strong capital generation capacity. SCF follows the internal ratings-based (IRB) approach to calculate credit risk-related RWA in its Spanish portfolio and in part of its French, German and Nordic portfolios, and applies the standard approach for the rest of the portfolios and risk categories. In addition, SCF has a good degree of control over RWA growth because of the bank's use of securitisation to obtain capital relief.

Capital buffers over regulatory requirements remain high, with a Supervisory Review and Evaluation Process (SREP) requirement for the CET1 ratio of 7.89%. The bank's regulatory leverage ratio (fully loaded) was 8.9% as of December 2022, declining from 9.4% as of the end of December 2021 but remaining substantially above the regulatory requirement of 3%.

The difference between SCF's Moody's TCE ratio and regulatory CET1 ratio is partly explained by our application of more conservative risk weighting to the sovereign exposure compared with regulators (for example, we apply a 50% risk-weight for Spain's sovereign bonds compared with the regulatory risk-weight of 0%).

Exhibit 4

SCF operates with adequate capital ratios

Source: Moody's Investors Service and SCF annual reports

Strong profitability, with a few challenges looming ahead

We assign SCF a profitability score of baa1, consistent with a return on tangible assets (ROA) of 1.0%-1.25% and in line with the bank's most recent performance (ROA of 1.19% in 2022).

SCF has strong profitability metrics. The bank's ROA has remained above 1% for several years, with the exception of 2020 when its profitability was hit by higher credit costs and a number of extraordinary charges³.

SCF achieved revenue growth in 2022 (+4%) despite a sharp increase in funding costs, which led to a 7 bps tightening in net interest margin compared with 2021. The bank's revenue was however supported by an increase in business volumes, with its loan book growing by 6.7% in the year mainly in the auto finance business, despite negative market trends affecting new passenger car registrations. Fee and commission income, which grew by 2.9%, and stronger earnings from operating leasing activity, also boosted revenue growth. Stronger revenue and a decline in credit costs led to a 7.8% increase in SCF's net income, despite a substantial increase of 4.9% in operating expenses because of high inflation and a number of strategic investments and business acquisitions. The increase in operating costs translated into a slight deterioration in the cost-to-income ratio, which remained at a still-favourable level of 43.5% in 2022 (43.1% in 2021).

Although we expect SCF to maintain strong profitability, the bank will face a number of challenges over the outlook period. Main obstacles will stem from pressure on funding costs as a consequence of monetary policy tightening, and headwinds affecting the European automotive industry [where recovery to prepandemic levels will not take place before 2025 given the challenging global macroeconomic environment and regardless of the improvements in the automotive supply chain](#). We nevertheless expect the financing of used vehicles to offset the pressure from the new car financing business, providing stability to SCF's revenue. In addition, significant declines in the cost of credit, which was marginally above its 2019 level in 2022, are unlikely.

Exhibit 5

SCF's profitability metrics are strong

Source: Moody's Investors Service and SCF annual reports

Funding profile is constrained by a high reliance on market funding

We assign SCF a Funding Structure score of b1, two notches above its macro-adjusted score of b3. We make a two-notch positive adjustment to the score to account for the relatively short-term maturity of SCF's loan portfolio, which reduces risk related to maturity transformation (that is, maturity mismatch between the bank's assets and liabilities), and the less-confidence sensitivity of intragroup funding, which represented 9% of total funding as of year-end 2022.

SCF's funding profile is characterised by a high reliance on market funding, partly driven by the lack of access to customer deposits in some of the jurisdictions where it operates. As of the end of 2022, the bank's market funds/tangible banking assets (TBA) was a high 53%. SCF's liquidity management comprises a variety of funding sources, and includes the provision of liquidity by Banco Santander as a backstop. All of SCF's subsidiaries are nevertheless required, per Banco Santander's internal policy, to have the capacity to provide for their own funding needs without parental support⁴.

SCF increased substantially its reliance on European Central Bank's (ECB) funding in 2020 because of the favourable terms of the central bank's TLTRO III programme. The use of ECB funds peaked at 18% of total funding as of year-end 2021, reducing to 16% as of year-end 2022 as the bank started to repay the borrowed amounts. The repayment of ECB funds will continue in 2023 and 2024 until the expiry of the TLTRO III programme. As its reliance on ECB funding gradually reduces, we expect SCF to increase resort to other traditional funding sources such as senior unsecured debt (17% of total funding in December 2022), securitisation notes (12%) or customer deposits, which grew by 6.2% in 2022, representing 38% of total funding by year-end.

SCF's Liquid Resources score of baa3 is driven by the bank's stock of liquid banking assets, which was 11% of TBA as of December 2022. We make a one-notch positive adjustment from the ba1 macro-adjusted score to account for ongoing liquidity support provided by Banco Santander. In 2022, the bank invested part of its large cash position at the end of 2021 (79% of total liquid assets) in government bonds in light of the more attractive market yields, which translated into a more balanced composition of liquid assets between cash (48% of liquid assets) and government bonds (44%) at the end of the year.

Exhibit 6

SCF's funding profile is characterised by a high reliance on market funding

Sources: Moody's Investors Service and SCF annual reports

Strong geographical diversification is offset by the lack of business diversification

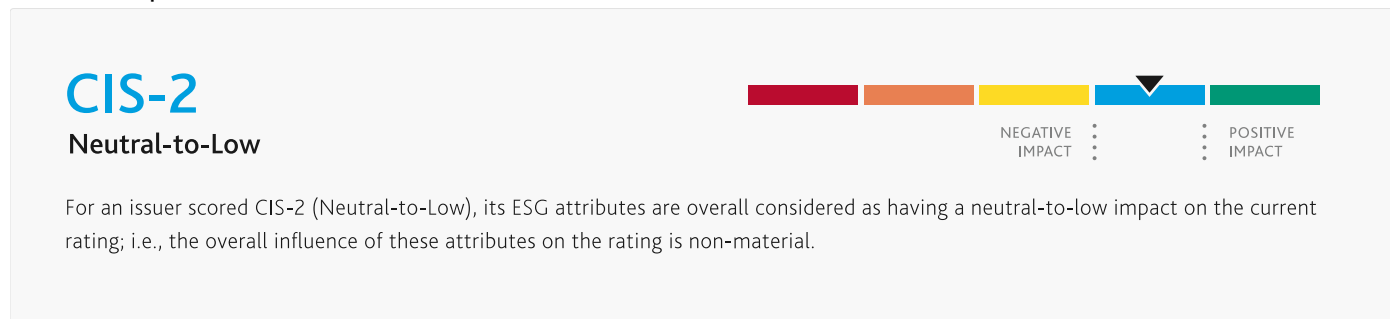

Our assessment of the strong geographical diversification in SCF's balance sheet and income sources is reflected in a one-notch positive qualitative adjustment to the Business Diversification score. However, this adjustment is offset by our one-notch downward adjustment of SCF's BCA for the lack of business diversification because the bank is mainly involved in consumer finance. Overall, these adjustments result in an unchanged BCA of baa2.

ESG considerations

Santander Consumer Finance S.A.'s ESG Credit Impact Score is Neutral-to-Low CIS-2

Exhibit 7

ESG Credit Impact Score

Source: Moody's Investors Service

SCF's **CIS-2** indicates that ESG considerations do not have a material impact on the current ratings.

Exhibit 8

ESG Issuer Profile Scores

Source: Moody's Investors Service

Environmental

SCF faces moderate environmental risks, primarily because of its portfolio exposure to carbon transition risk in its auto lending business. Such risks are associated with stricter emission regulations and the trend towards low and zero emission vehicles. The risk is somewhat mitigated by the short-term nature of the bank's loan portfolio and the bank's flexibility to finance multiple dealers and automaker franchises in response to shifting market pressures and consumer preferences towards low-emission vehicles.

Social

SCF is exposed to high industrywide social risks particularly related to customer relations risk and associated regulatory and litigation risks, requiring high compliance standards. These risks are mitigated by SCF's developed policies and procedures. SCF's high cyber and personal data risks are mitigated by the group's sound IT framework.

Governance

SCF faces low governance risks, and its risk management framework and corporate governance are in line with industry practices. Being present in several countries, the bank operates with a relatively complex legal structure which the bank is trying to simplify by converting a number of foreign subsidiaries into branches. Because SCF is effectively controlled by Banco Santander through its 100% shareholding, we have aligned the subsidiary's board structure, policies and procedures score with that of its parent, given the bank's strategic importance and public affiliation with the group, the parent's oversight of its subsidiary board and the regulated nature of both entities.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moody's.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Affiliate support

SCF has a high probability of receiving support from its parent, Banco Santander. As a result of our support assessment, SCF's Adjusted BCA is baa1, one notch above its BCA.

Loss Given Failure (LGF) analysis

SCF is subject to the EU Bank Resolution and Recovery Directive (BRRD), which we consider an operational resolution regime. We assume a residual TCE of 3% and post-failure losses of 8% of tangible banking assets, a 25% run-off in junior wholesale deposits and a 5% run-off in preferred deposits, and assign a 25% probability to deposits being preferred to senior unsecured debt. We apply a standard assumption for European banks that 26% of deposits are junior. These metrics are in line with our standard assumptions.

Because SCF belongs to the same resolution group as Banco Santander, we apply the Advanced LGF analysis of its parent, which translates into an extremely low loss given failure for SCF's deposits and senior unsecured debt. The bank's long-term deposit and senior unsecured debt ratings are capped at A2 by Spain's Baa1 sovereign rating.

The same LGF analysis indicates a moderate loss severity for junior senior creditors in the event of the bank's failure, leading to a Baa1 rating for these securities, in line with the bank's Adjusted BCA of baa1.

For more junior securities, our initial LGF analysis confirms a high loss given failure because of the small volume of debt and limited protection from more subordinated instruments and residual equity. We also incorporate two additional downward notches for preference share instruments to reflect the coupon suspension risk ahead of a potential failure.

Government support considerations

There is a low likelihood of government support for SCF's debt and rated wholesale deposits in the event of its failure because of its current position within the Spanish market. Therefore, we do not incorporate any associated uplift into SCF's ratings.

Counterparty Risk Ratings (CRRs)

SCF's CRRs are A2/Prime-1. The CRR, before the government cap, is positioned three notches above the Adjusted BCA of baa1, reflecting the extremely low loss given failure from the high volume of instruments that are subordinated to CRR liabilities.

SCF's CRRs are constrained by Spain's sovereign rating of Baa1. Under our methodology, a bank's CRR will typically not exceed the sovereign rating by more than two notches.

Counterparty Risk (CR) Assessment

SCF's CR Assessment is A3(cr)/Prime-2(cr). The CR Assessment, before the government cap, is positioned three notches above the Adjusted BCA of baa1, based on the buffer against default provided to the senior obligations represented by the CR Assessment by subordinated instruments. The main difference with our Advanced LGF approach used to determine instrument ratings is that the CR Assessment captures the probability of default on certain senior obligations, rather than the expected loss, thereby focusing purely on subordination and taking no account of the volume of the instrument class.

The CR Assessment is capped at A3. The CR Assessment will not typically exceed the sovereign's own rating by more than one notch, or two notches where the Adjusted BCA is already above the sovereign rating.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
